

SCHOTT Primary Package

SCHOTT PHARMA

syriQ BioPure® 5.5 ml

The first large-volume staked-needle glass syringe for biologics

- Standard staked-needle PFS* that ensures reliable container closure integrity (CCI)
- Ultra-low tungsten and glue residuals
- High quality Type 1 FIOLEX® CHR*** borosilicate glass for low E&L profile
- Rigid Needle Shield (RNS) with low pull-off force and an E&L** profile designed for biologics
- Homogeneous silicone layer to ensure full volume injection
- Full system verified including coated plunger

Packaged in a 42-piece nest format aligned with standard secondary packaging. Also fully compatible with all major fill-and-finish equipment

SCHOTT PHARMA

syriQ BioPure® 5.5 ml and YpsoMate® 5.5*

Transforming healthcare with patient-centered development of large-volume prefilled syringes for autoinjector use

- Supports the trend toward higher drug volumes
- Enables shift from intravenous to subcutaneous delivery
- Facilitates home injection of large-volume biologics
- Enables easy and comfortable self-management

The syriQ BioPure® 5.5 ml syringe has been:

- co-developed with the YpsoMate® 5.5 autoinjector*, an automated injection device designed for subcutaneous delivery across all patient groups
- successfully verified for compatibility with the NeoFlex™ plunger**
