

STATE-OF-THE-ART PRE-FILLED SYRINGE AND CARTRIDGE FILLING

Our fully automated, high-speed line facilitates aseptic nest filling of all commercially available RTU syringes and cartridges.

Recipharm provides smooth, fast, and flawless tech-transfers with ReciPredict, our unique prediction model. It streamlines tech-transfers with robust, reliable, and fast predictions, improving timelines and eliminating the risk of failure in manufacturing.

- ▶ Reliable and faster tech-transfers
- ▶ Science based
- ▶ Robust predictions
- ▶ Process improvement
- ▶ Lower risk of failure

Sterile fill & finish

Development and manufacturing across biologics & small molecules

Solids & others

Development and manufacturing solutions for oral delivery of medicines

ReciBioPharm

Development and GMP manufacture of ATMPs (Plasmid, xRNA, Viral vectors, Microbiome)
